

Press line for stamped and embossed plate production

Complete production system – Up To 1 sqm (11 sqf) plates
Up to 900 pcs/hour – Quick die change

System overview

System description

A 5,000 tons Hydraulicco embossing press is integrated into a complete production system. At one end, metal strips are fed into Press 1 for stamping.

Plates are then transferred to Press 2 for embossing and forming.

Finally, the plates are automatically straightened and stacked on pallets, ready for pick-up.
